EZ VENT, LLC

**ODOR CONTROL
AND
VENTILATION PRODUCTS**

Don't Let Your Next
Ventilation Project be Exhausting

About Our Vents

EZ Vent, LLC manufactures PVC vents for use with wastewater pump stations and valve vaults. Our mushroom cap design is less intrusive than the antiquated steel gooseneck design.

The basic vent and BioVent are manufactured from gray Sch40 PVC pipe and a Sch 80 flange. Each vent consists of a base flange for mounting, and 18" riser pipe, perforated PVC bird screen, and a cap. The BioVent integrates a carbon cartridge for odor removal.

Our units ship complete, no assembly or fabrication is required.

Vent sizes available are 4", 6", 8" 10" and 12". Each come with two quick removal pins in the cap for easy inspection of the barrel or changing the BioVent cartridge.

Units install in under 15 minutes.

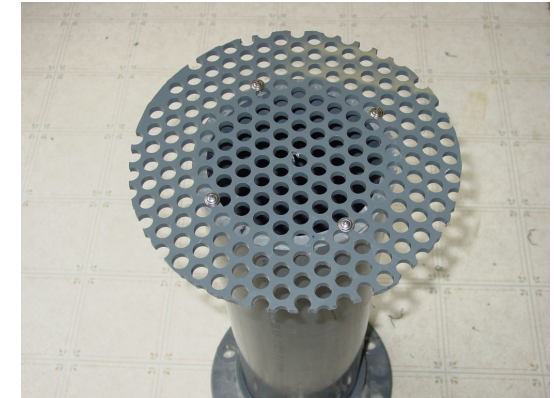

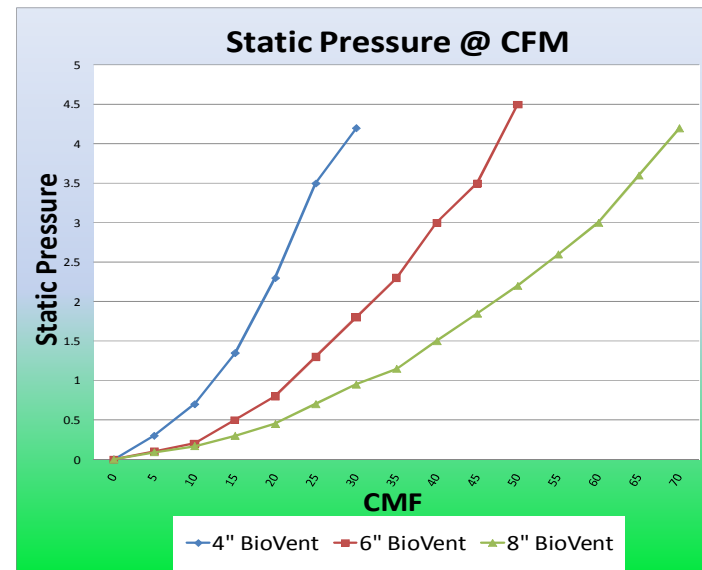

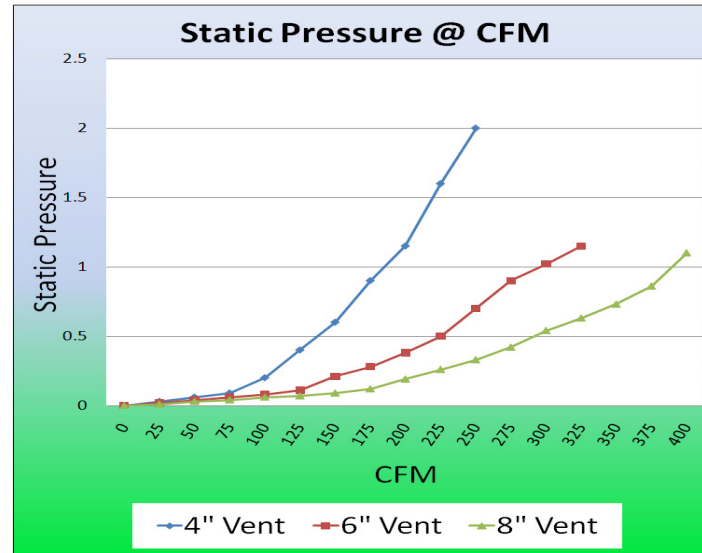

Cross section of a BioVent with carbon cartridge insert.

Basic Vent is identical construction without carbon cartridge insert.

What Size Basic Vent to Use?

The top chart graphs 4", 6" and 8" Basic Vents for their CFM capabilities. The bottom graph has BioVent Cartridge data. Additional data is available upon request.

Perforated PVC Bird Screen prevents intrusion.

Quick Release pins for fast and easy inspections.

Simple mounting with SS wedge anchors.
